WHAT IS CLAIMED IS:

1. A disposable, semi-enclosed applicator for distributing a substance onto a target surface comprising a first side, a second side, and an internal cavity between said first and second sides, said applicator further having at least one opening, such that said internal cavity is externally accessible, wherein:

- a. said first side comprises a porous sheet containing at least 50%, by weight, non-absorbent material;
- b. said second side comprises an absorbent sheet containing at least 50%, by weight, of cellulosic material; and
- c. wherein said applicator further comprises a substantially fluid-impervious barrier layer within said internal cavity adjacent said first side.
- 2. The applicator of Claim 1, further comprising a second substantially fluid-impervious barrier layer adjacent said second side.
- 3. The applicator of Claim 1, wherein said first side further includes a substantially absorbent layer located between said porous sheet and said barrier layer.
- 4. The applicator of Claim 1, wherein said porous sheet comprises a fibrous nonwoven.
- 5. The applicator of Claim 1, wherein said porous sheet comprises an apertured film.
- 6. The applicator of Claim 1, wherein said absorbent sheet is a paper comprised of 100% natural cellulose fibers.
- 7. The applicator of Claim 1, wherein said absorbent sheet is a fibrous nonwoven.
- 8. The applicator of Claim 1, further comprising a friction-enhancing element located at least partially within said first cavity during use.

9. The applicator of Claim 1, further comprising a pocket located at least partially within said internal cavity.

- 10. A disposable, semi-enclosed applicator for distributing a substance onto a target-surface comprising a first side, a second side, and an internal cavity between said first and second sides, said applicator further having at least one opening, such that said internal cavity is externally accessible, wherein:
 - a. said first side comprises a porous non-absorbent sheet having a basis weight of no greater than about 100 gsm;
 - b. said second side comprises an absorbent sheet having a basis weight of no greater than about 140 gsm; and
 - c. said applicator further comprises a substantially fluid-impervious barrier layer within said internal cavity adjacent said first side;

said applicator having a Ratio of Absorbency of said second side to said first side of at least about 1.5.

- 11. The applicator of Claim 12, wherein the Ratio of Absorbency of said second side to said first side is at least about 2.
- 12. The applicator of Claim 13, wherein the Ratio of Absorbency of said second side to said first side is at least about 4.
- 13. The applicator of Claim 12, wherein said first side has a basis weight of no greater than about 75 gsm, and said second side has a basis weight of no greater than about 120 gsm.
- 14. The applicator of Claim 12, wherein said first side has a basis weight of no greater than about 55 gsm.
- 15. The applicator of Claim 16, wherein the ratio of Absorbency of said second side to said first side is at least about 4.
 - 16. The applicator of Claim 1, further comprising a temperature-changing element.
